

## PubMed® for Librarians: Automatic Term Mapping (ATM)

1. Automatic Term Mapping tries to map your search terms to three translation tables:

---

---

---

2. ATM recognizes journal titles entered in three different formats:

---

---

---

3. The **Author Index** includes all author names going back to \_\_\_\_\_.

4. The **Full Author Name** Index began in \_\_\_\_\_.

5. NLM suggests this format for a comprehensive author name search:

---

6. Three ways to bypass or turn off ATM:

---

---

---
